Summary

Detail-oriented and curious problem solver with a passion for building reliable, user-focused software. Quick learner who enjoys turning ideas into working products, collaborating with teams, and taking ownership of quality from design to delivery. Looking to contribute as a Software Developer and grow through real-world engineering challenges.

Education

M. Kumarasamy College of Engineering 2023 – 2027
B.E. Electronics and Communication Engineering *CGPA: 8.46/10*

SPK Matriculation Higher Secondary School 2023
Higher Secondary *83%*

Technical Skills

Languages: Java, SQL, JavaScript, Python
Web Development: HTML, CSS, React.js, Node.js, Express.js, REST APIs, API Integration
Databases: MySQL, MongoDB
AI / ML: Generative AI, Large Language Models (LLMs), YOLO
Tools & Deployment: Git, GitHub, Docker, VS Code, Eclipse, npm, Vite, Vercel, Render

Internships & Training

IoT in Robotics – Internship Training Jan 2025
NSIC Technical Services Centre *Chennai*
– Built software interfaces for IoT-based robotic systems and worked with sensor APIs and automation logic

Intern – Electronics Manufacturing Jun – Jul 2025
Popular Systems *Coimbatore*
– Hands-on exposure to wiring and manufacturing for electronics, solar energy systems and medical equipment

Projects

LoomGuard-AI – Textile Quality Assurance System | Python, YOLO, ONNX Runtime, FastAPI, React, Docker
– Developed an AI-based textile defect detection system using YOLO for automated quality inspection.
– Built a full-stack application with React, FastAPI, Docker, and ONNX Runtime for real-time defect analysis.

Hotel Management System | Node.js, Express.js, REST APIs, HTML, CSS, MySQL
– Created a hotel management application with room booking, user authentication, and admin dashboard functionalities.
– Implemented REST APIs and MySQL database integration for efficient booking and customer management.

Temple Management Application | Node.js, JavaScript, Bootstrap, MySQL
– Developed a full-stack temple management application supporting devotee registration, bookings, donation management, and receipt generation.
– Integrated OTP verification and database management features to enhance security and user experience.

Certifications

- System Design Fundamentals – Pearson (Coursera)
- Generative AI with Large Language Models – Coursera
- Java (Basic) Certification – HackerRank

Achievements

- German Utility Model (Gebrauchsmuster) Granted – Smart Fire Survivor Detection System, ID: 20264104647
- TUNARA ’26 – First Place in Product Expo
- ICCNCT 2026 – Published an IEEE Research Paper titled “Efficient Spectrum Sensing using Energy Detection”
- TCS CodeVita Season 13 – Achieved Global Rank 7456
- HackIt ’25 – 24-hour National Hackathon
